

Environmental Policy

We recognise that our operations have an effect on the local, regional and global environment. As a consequence of this, the management are committed to continuous improvements in environmental performance and the prevention of pollution.

Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.

The company considers the environmental impacts of its products at all stages of their life cycle - from design, to manufacturing, customer use, and finally disposal.

We will endeavour to minimize waste, especially hazardous waste, and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods.

The company maintains that a primary part of its environmental Strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.

Through coordinating route planning and delivery schedules we seek to realize the dual benefits of reduced fuel consumption and lower exhaust emissions.

We will implement our policies through guidelines and training.

We will conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations.
